

Canfield (Great & Little)

Great & Little Canfield: According to Dr Thresh's Report of 1901, p117, Great and Little Canfield were supplied by two public and several private Wells.

Pump/Well No. CAN01

Location: Well in front garden, Green Easter, Cuckoo Lane, Hellmans Cross, Great Canfield, Uttlesford, Saffron Walden, Essex, CM6 1LB

NGR: Easting: 558043m, 218834m

Photographer: Sibyl Thomas (Author)

Private or communal: Private

Date Photographed: 2009

Scheduled Monument: No

Listed Structure: Yes

Grade of Listing: II

Date Listed: 17/10/1983

LBS Number: 352676

Listing Text: Well-head, C19. Circular brick surround to well, wooden collar, wooden cross-frames, arch-braced, supporting thatched roof. Windlass with wooden roller and cranked iron handle.

Well Series Record? -

Well or borehole description: Brick Well shaft, date unknown

Water-raising mechanism: Winch: C19

Significant features: **Description:** Thatched oak framed well head, with winch. Brick well head and brick circular shaft.
Well Shaft: Brick circular
Depth/diameter: unknown
Well head: Circular red brick
Winch: Thatched well head, Oak frame, with iron handle and metal chain

Working Order: No (no bucket, with bucket – then yes)

Pump/Well No. CAN02

Location: Pump at rear of Peckers Farm, Green Street, Great Canfield, Uttlesford, Essex, CM6 1LE
NGR: Easting: 557216m, 219107m
Photographer: Sibyl Thomas (Author)
Date Photographed: 2009
Private or Communal: Private
Scheduled Monument: No
Individually Listed Structure: Yes
Grade of Listing: II
Date Listed: 17/10/1983
LBS Number: 352689
Listing Text: Cast iron pump, late C19. Cap with acanthus design and pineapple finial. Handle ending in knop. Maker's name 'E. Watson, SB, B. Stortford' in oval border.

Well Series Record? -
Well or borehole description: Unknown
Water-raising mechanism: Cast Iron Lift Hand Pump (c.19)
Significant features: **Description:** Cast Iron Lift Hand Pump (c.19) in front of outbuildings
Lower Body: Three bands, smooth body
Upper body: Central band with makers mark
Spout: Located on lower body, acanthus leaves, scrolled bucket hook
Cap: fluted with pineapple finial
Handle: Intact wrought iron located on rear of pump with knop weight
Makers Mark: E Watson, SB, Bishops Stortford

Working Order: No

Well Series Record? Bullocks farm, Hope End, Great Canfield (Well sunk 1900, noted as having a handpump but with sealed top in 1965.

Well or borehole description: Brick well located at front of farm house

Water-raising mechanism: electric pump to tap

Significant features: **Description:** Farm house well located in typical position at front of farm house. new well head constructed in 2007

Working Order: Yes water is drawn via an electric pump to a tap.

The following pumps are recorded in Whitaker, W & Thresh, J (1916) Memoirs of the Geological Society England and Wales. The Water Supply of Essex from underground sources, Great Britain, Jas Truscott & Son

These Wells and pumps are still to be confirmed to the Author, they come from records made in 1916, so it might be that they no longer exist. Many though are on private property and the Author would welcome confirmation of their existence and to record them.

CAN08: Lingford's Cottage, Hellmans Cross, Great canfield, Dunmow, Essex, CM6 1LB
Well sunk in 1947, September by Jennings, noted as having handpump but disused in 1965

CAN09: The Vicarage, Great Canfield
Well sunk in 189 by G Ingold, 30ft deep

CAN10: Mr F Martins Farm?, Great Canfield
Two boreholes sunk in C19 by Featherby each 25ft in boulder clay

Chickney

Currently no wells or handpumps have been reported or found by the Author to date.

The following pumps are recorded in Whitaker, W & Thresh, J (1916) Memoirs of the Geological Society England and Wales. The Water Supply of Essex from underground sources, Great Britain, Jas Truscott & Son

These Wells and pumps are still to be confirmed to the Author, they come from records made in 1916, so it might be that they no longer exist. Many though are on private property and the Author would welcome confirmation of their existence and to record them.

CHICKN01: Station House, Sibleys, Chickney
Well date unknown- visible but dis-used in 1965

CHICKN02: Chickney Hall, Chickney
Works to well noted done by J R Brown & Co, Ipswich 1935, in-use and had electric pump in 1965

Chesterfords (Great & Little)

Great Chesterford: According to the report of the medical officer (W. Armstead) for 1912, there are many private Wells. Most in the village are dug into chalk or into gravel, but some are bored, one at Crown house to 220ft, one at the Brewery to 200ft and two others at the same. There is no public supply and the private Wells mostly vary form 10-60ft.

Little Chesterford: According to the Dr Thresh's report of 1905, p.61, there are no public works. But several private Wells, mostly in chalk.

Clavering

According to the report of the medical officer (W. Armstead) for 1912, there were four public pumps, one on Hill Green(see CLAV01) . One is at the new Well 1912, Sheepcote Green, about 370ft above Ordnance datum, water level at about 244ft, shaft 135ft, bored 20ft. One is in the middle street supplied by a spring. One on stickling green is supplied by a well in boulder clay then gravel. There are now (1913) five public wells, three getting their water from springs in the gravel.
